## ETHYPHARM'S MIRTAZAPINE ORODISPERSIBLE TABLET IS LAUNCHED UNDER LICENSING

agreement with Nycomed Scandinavia.

Ethypharm announces that its partner Nycomed has just launched Mirtazapine orodispersible tablet in Denmark, Sweden and Norway on 5 May last, using the Ethypharm Flashtab technology. Nycomed thus becomes the first laboratory to market the product in Scandinavia.

Dosed at 15, 30 and 45 mg, the generic of Organon Remeron® Soltabs® is an orodispersible tablet which disintegrates rapidly in the mouth without water. Ethypharm's Flashtab® presents numerous advantages in terms of treatment observance, dosage precision and patient comfort. This medicine is indicated in the treatment of depressive episodes.

A Partner of Ethypharm since the past twelve years, Nycomed is listed amongst the Scandinavian Pharmaceutical Market Leaders.

« We are very happy to have signed this Licensing Agreement with Nycomed; they are a privileged Ethypharm Partner who have already successfully launched Paracetamol Flashtab® in Belgium and the Scandinavian territories, and recently Buprenorphine in Denmark » declared Bruno Delie, Ethypharm's Business & Marketing Director.
